

OSCE Checklist: Cervical Screening

Introduction

1	Gather equipment	
2	Wash your hands and don PPE if appropriate	
3	Introduce yourself to the patient including your name and role	
4	Confirm the patient's name and date of birth	
5	Explain what the procedure will involve using patient-friendly language	
6	Explain the need for a chaperone	
7	Gain consent to continue with the clinical procedure	
8	Ask the patient if they have any pain before continuing with the clinical procedure	
9	Ask the patient to remove their underwear for the procedure and provide them with privacy whilst they get undressed	

Vulval inspection

10	Don gloves and position the patient in the modified lithotomy position	
11	Inspect the vulva including asking the patient to cough	

Inserting the speculum

12	Re-check that the patient is happy to continue with the examination	
13	Use your left hand (index finger and thumb) to separate the labia	
14	Gently insert the speculum sideways (blades closed, angled downwards and backwards)	
15	Once inserted, rotate the speculum back 90° (so that the handle is facing upwards)	
16	Open the speculum blades until an optimal view of the cervix is achieved	
17	Tighten the locking nut to fix the position of the blades.	

Visualising the cervix

18	Inspect the cervix	
----	--------------------	--

Cervical screening sample

19	Insert the endocervical brush through speculum into the endocervical canal	
20	Rotate the brush 5 times, 360 degrees, in a clockwise direction	
21	Remove the endocervical brush, avoiding touching the speculum as you do so	
22	Deposit the tip of the endocervical brush into a liquid-based cytology container	

Removing the speculum

23	Loosen the locking nut on the speculum and partially close the blades	
24	Rotate the speculum 90°, back to its original insertion orientation	
25	Gently remove the speculum, inspecting the walls of the vagina as you do so	

26	Re-cover the patient and explain the examination is complete	
27	Dispose of the used equipment into a clinical waste bin	
To complete the procedure...		
28	Thank the patient for their time	
29	Label the sample	
30	Dispose of PPE appropriately and wash your hands	
31	Summarise your findings	
32	Suggest further assessments and investigations (e.g. urinalysis, vaginal swabs, ultrasound, complete abdominal examination, HPV testing)
