## OSCE Checklist: Speculum Examination

### Introduction

1. Gather equipment
2. Wash your hands and don PPE if appropriate
3. Introduce yourself to the patient including your name and role
4. Confirm the patient’s name and date of birth
5. Explain what the procedure will involve using patient-friendly language
6. Explain the need for a chaperone
7. Ask the patient if they have any pain before proceeding with the clinical procedure
8. Ask the patient to remove their underwear for the procedure and provide them with privacy whilst they get undressed

### Vulval inspection

9. Don gloves and position the patient in the modified lithotomy position
10. Inspect the vulva including asking the patient to cough

### Inserting the speculum

11. Re-check that the patient is happy to continue with the examination
12. Use your left hand (index finger and thumb) to separate the labia.
13. Gently insert the speculum sideways (blades closed, angled downwards and backwards).
14. Once inserted, rotate the speculum back 90° (so that the handle is facing upwards).
15. Open the speculum blades until an optimal view of the cervix is achieved.
16. Tighten the locking nut to fix the position of the blades.

### Visualising the cervix

17. Inspect the cervix

### Removing the speculum

18. Loosen the locking nut on the speculum and partially close the blades.
19. Rotate the speculum 90°, back to its original insertion orientation.
20. Gently remove the speculum, inspecting the walls of the vagina as you do so.
21. Re-cover the patient and explain the examination is complete
22. Dispose of the used equipment into a clinical waste bin

### To complete the examination...

23. Thank the patient for their time
24. Dispose of PPE appropriately and wash your hands
