

## osce Checklist: Cushing's Syndrome Examination

|    | ,  |  |
|----|--|--|
| ln | troduction   |  |
| 1  | Wash your hands and don PPE if appropriate   |  |
| 2  | Introduce yourself to the patient including your name and role   |  |
| 3  | Confirm the patient's name and date of birth   |  |
| 4  | Briefly explain what the examination will involve using patient-friendly language  |  |
| 5  | Gain consent to proceed with the examination   |  |
| 6  | Adjust the head of the bed to a 45° angle  |  |
| 7  | Adequately expose the patient  |  |
| 8  | Ask if the patient has any pain before proceeding  |  |
| G  | eneral inspection  |  |
| 9  | Perform a brief general inspection of the patient, looking for clinical signs suggestive of Cushing's syndrome (e.g. facial plethora, dorsocervical fat pad)                               |  |
| 10 | Look for objects or equipment on or around the patient (e.g. mobility aids)  |  |
| Ha | ands   |  |
| 11 | Inspect the hands for signs suggestive of Cushing's syndrome (e.g. skin thinning), Cushing's disease (hyperpigmentation) or other underlying diseases (e.g. fingerprick marks in diabetes) |  |
| Aı | ms   |  |
| 12 | Inspect the arms for bruising or skin thinning   |  |
| 13 | Palpate the patient's radial pulse and offer to record the blood pressure  |  |
| Fa | ace  |  |
| 14 | Inspect the face for features associated with Cushing's syndrome (moon facies, facial acne, hirsutism) or other diseases (e.g. butterfly rash in SLE)                                      |  |
| 15 | Inspect inside the mouth for oral thrush or hyperpigmentation  |  |
| 16 | Assess visual fields by confrontation looking for bitemporal heminanopia (pituitary adenoma causing Cushing's disease)   |  |
| CI | nest and back  |  |
| 17 | Inspect the chest and back for features associated with Cushing's syndrome (dorsocervical/supraclavicular fat pads, kyphosis, gynaecomastia)   |  |
| Al | odomen   |  |
| 18 | Inspect the abdomen for central obesity or striae  |  |
| Le | egs  |  |
| 19 | Inspect the legs for skin thinning, bruising or peripheral oedema  |  |
| 20 | Ask the patient to stand from a sitting position with their arms crossed to assess for proximal muscle weakness  |  |
|    |  |  |

| To | To complete the examination  |  |  |
|----|--|--|--|
| 21 | Explain to the patient that the examination is now finished  |  |  |
| 22 | Thank the patient for their time   |  |  |
| 23 | Dispose of PPE appropriately and wash your hands   |  |  |
| 24 | Summarise your findings  |  |  |
| 25 | Suggest further assessments and investigations (e.g. cardiovascular examination, CBG & HbA1c, U&E, salivary cortisol, urinary cortisol, dexamethasone suppression test, MRI pituitary) |  |  |
